Atomic Orbital

# Brand style guide

With you every step of the way.

Version 2026 · Replaces the 2024 Target3D guide

# Why this guide exists

The purpose of this style guide is to keep every Atomic Orbital touchpoint consistent, online and offline, and to make sure our materials represent the company’s values in the same way, every time.

It covers our messaging, our logo, colour, typography and how the brand comes together on letters, cards and the web. Everything in it is available to download from the brand and press kit page.

# Mission, vision and values

## Mission

To deliver the best innovative motion capture, 3D technologies, virtual production and volumetric capture technologies to our customers.

## Vision

Globally the most trusted supplier of motion capture, 3D technologies, virtual production and volumetric capture technology solutions.

## Core values

1. Attention to detail
2. Innovative and dynamic
3. Knowledgeable and informative
4. Unbiased, consultative and trustworthy
5. Collaborative and solutions oriented

# Built on the Target3D story

**Target3D was founded in May 2017 by Allan Rankin and Ashley Keeler.** Beginning as resellers of motion capture equipment, the company expanded over the following years to operate globally, with headquarters in London, Target3D Iberia in Valencia, Spain and Target3D New Zealand in Gisborne, New Zealand.

Target3D became the leading reseller of a diverse range of 3D and immersive technologies, and the sole distributor for key brands including OptiTrack, Noitom and Captury, offering a full consultancy service from purchase to installation and training.

Its London studio is part of the Advanced Media Production network of studios, in partnership with Digital Catapult and Innovate UK, offering motion capture, virtual production, volumetric capture and post production. Atomic Orbital carries that heritage forward.

Years of mocap install experience

# Six reasons customers choose us

## In your time zone

Access our experts in real time, when your business needs us, so your project stays on time and on target.

## Try before you buy

Meet the onsite experts and experience our biomechanics area, edit suite, VR area, VP and mocap stages.

## All logistics covered

We handle shipping, duties and customs. Our one-year support contract keeps our expertise with you after set-up.

## Install and training

From design to install and training. Our engineers have installed mocap tech for 20+ years, with an SLA as standard.

## Consultancy service

A team of independent, unbiased motion capture experts with over 30 years' combined experience.

## Hire and backup

For affordability, or if you need the kit just once, we offer wet and dry system hire.

# Our logo

The Globe A is our signature, identifier and stamp of quality. It should be the most consistent part of everything we make, so a few simple rules keep it that way.

# Globe A, colour step 3

**Teal ring**

The globe. Always teal, always the outer element.

**Orange orbit and nucleus**

The only orange in the logo. Never recoloured.

**Meridian**

A quiet grey line that gives the globe depth.

**The A**

Upright, never rotated. Dark on light, light on dark.

# Size and clear space

## Minimum size

Never smaller than 24 px on screen or 8 mm in print. At 44 px and under, switch to the small-size mark: its thicker lines stay crisp at icon sizes.

44 px

24 px

Full lockup

## Clear space

Keep one eighth of the logo’s width (x) clear on every side. No text, photo edges or graphics inside that zone.

# Pick the file for the background

### Lockup, for light backgrounds

Primary use: white and light grey.

### Lockup, for dark backgrounds

Brighter teal and orange for dark surfaces.

### Mark, for light backgrounds

Avatars, stickers, tight spaces.

### Mark, for dark backgrounds

Social profiles, video end cards.

# Favicons and the animated hero

## Favicons

favicon.svg follows the visitor’s light or dark setting. PNG icons at 32, 180 (Apple touch) and 512 px cover everything else.

512 px

180 px

32 px

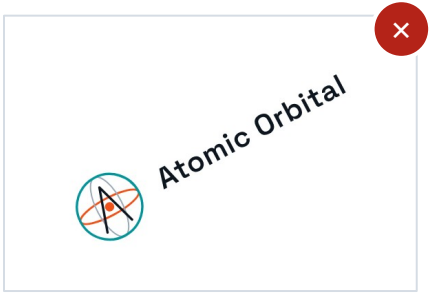

## Animated hero

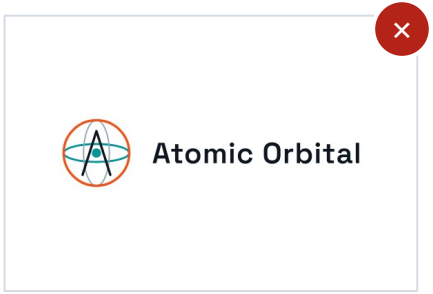

The orbit spins and the meridian turns. Use it in the website hero banner only.

It stops automatically for visitors who prefer reduced motion. Never use it in documents, email signatures or print.

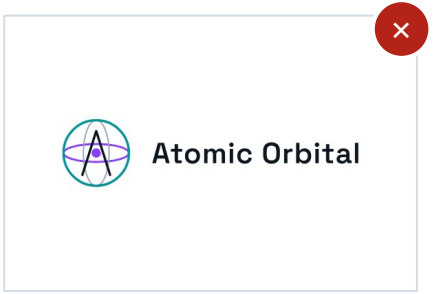

# Don’t do this to the logo

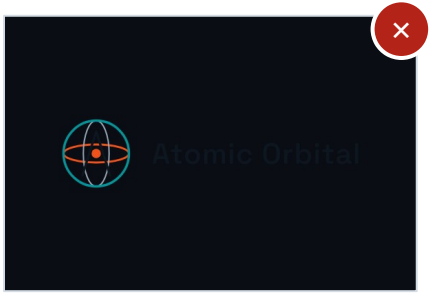

Don’t rotate the logo or the A

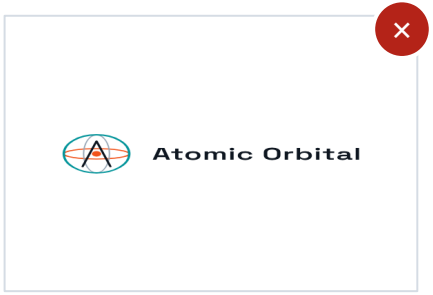

Don’t swap the teal and orange

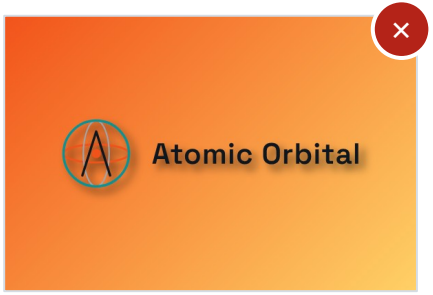

Don’t recolour the orange

Don’t use the light file on dark

Don’t stretch or squash

No shadows or busy backgrounds

# Our colour palette

Teal and orange on calm neutrals. Roughly 70% neutrals, 20% teal and 10% orange, with one orange element per view.

# The default palette

**Teal (logo)**

Dark, never white

Colour balance

# 70 / 20 / 10

**70% neutrals** **20% teal** **10%**

## Neutrals do the heavy lifting

Backgrounds, surfaces, body text and lines. They keep pages calm and readable.

## Teal carries the brand

Headings, links, card tops, icons and charts. Use the text teal (#03797F) for anything people read.

## Orange is for one thing

One orange per view: the main button or the logo. Buttons take dark text, never white.

# Our typography

Space Grotesk for headings brings the precision of engineering; IBM Plex Sans keeps body copy warm, open and legible at every size.

# Three families, clear jobs

Aa

## Space Grotesk

SemiBold 600

Headings and short display lines

Included in the brand kit (SIL OFL).

Aa

## IBM Plex Sans

Regular 400 · Medium 500 · SemiBold 600

Body copy, UI and documents

Free from Google Fonts or IBM (SIL OFL).

Aa

## IBM Plex Mono

Regular 400

Figures, codes, colour values

Free from Google Fonts or IBM (SIL OFL).

# How the hierarchy fits together

## With you every step of the way

### From first consultation to install and training

Our engineers design, install and commission motion capture, virtual production and volumetric capture systems, then stay with you through training and support. Body copy is IBM Plex Sans, set comfortably with a line height of 1.6.

`#04959B · 17 px · 1.6`

**Heading 1**
Space Grotesk 600 · 40–64 px

**Heading 2**
Space Grotesk 600 · 28–42 px, teal

**Body**
